

# MORTAR PROCESSING SYSTEM

## MORTAR GUN 100

Gema©k

Innovative special tool consists of a supporting trestle with a mortar gun. The mortar tube of the Mortar Gun can be taken out and filled under the Gema©k Mortar Mixing Tap or with the scoop from a tub or wheelbarrow. To apply the mortar evenly, the pressure disc has a battery-powered motor, that can be set to a variable speed. A full type 100 mortar tube is good for laying approx. 4m of bricks based on 2 tracks (for a 5mm joint and a wall 10cm thick) or approx. 8m of bricks based on 1 track (for a 5mm joint and a wall 5cm thick).
