

# MORTAR PROCESSING SYSTEM WALL CLADDING INSULATION PANELS

Gema©k

## INFO FLYER

The Gema©k Mortar Processing System used for exterior walls is also very good for applying adhesive mortar to rigid wall cladding insulation panels.

The glue mortars supplied by manufacturers can be mixed perfectly in the Gema©k Mortar Mixer Tap.

Using the Gema©k Mortar Gun, adhesive mortar is dosed easily and quickly applied, away from the edges, so that no mortar gets between the seams when placing the insulation panels, which prevents insulation leaks.

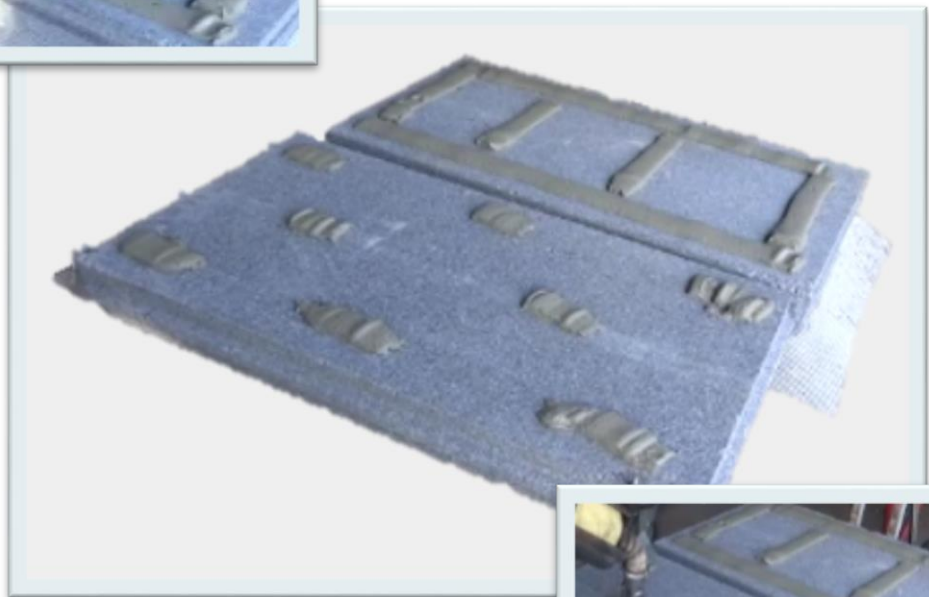

In addition, the panels can be fixed in place easily because the applied dose of glue mortar is at an even thickness.

The dosing of the Gema©k Mortar Gun lets you work to produce clean visible wall surfaces, and loss by spillage is no longer an issue.

The Gema©k Mortar Processing System can be an advantage during production and can improve the quality of the work.

SO MAKE THE MOST OF IT AND CHOOSE  
THE CONVENIENCE OF GEMA©K!
