

MORTAR PROCESSING SYSTEM APPLYING TILE CEMENT ON WALLS AND FLOORS

INFO FLYER

Gema©k

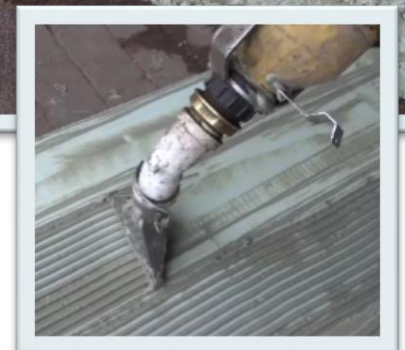

THE IDEAL COMBINATION

The Gema©k Mortar Processing System used for exterior walls is also very good for applying tile cement on walls and floors. The tile cement powders supplied by manufacturers can be mixed perfectly in the Gema©k Mortar Mixer Tap. Tile cement is dosed easily and quickly using the Gema©k Mortar Gun, with a universal 135 mm stainless steel nozzle and an exchangeable size 6, 8 or 10 mm stainless steel toothed comb. Placing, setting or laying of wall tiles, brick facing strips and/or floor tiles can be done quickly. Depending on the mortar and tiles and/or strips being placed, choose the appropriate comb height and the universal stainless steel nozzle to be used. The dosing of the Gema©k Mortar Gun lets you work to produce clean visible wall surfaces, and loss by spillage is no longer an issue. The Gema©k Mortar Processing System can be an advantage during production and can improve the quality of the work.

SO MAKE THE MOST OF IT AND CHOOSE
THE CONVENIENCE OF GEMA©K!
